

**Precision. Performance. Productivity.**

Intelligent Dosing and Dilution for TASKI scrubber driers

# Introducing TASKI Dosing and Dilution Control Systems

## Revolutionary Water and Chemical Management Innovations

For more than 50 years, TASKI has led the way in the floor care machine industry, delivering remarkable performance and increased operational efficiency—while reducing environmental impact. At the heart of the machines, advanced TASKI IntelliDose™ and TASKI IntelliFlow™ technologies provide unrivalled water and chemical management for superior cleaning that is better for the environment and your bottom line.

**TASKI IntelliDose** and **TASKI IntelliFlow** technologies work in concert with one another to deliver superior results.

1. The **TASKI IntelliDose** unit calculates and doses the precise amount of chemical for a perfectly balanced cleaning solution every time.
2. **TASKI IntelliFlow** then uses speed-dependent logic to deliver the precise amount of that solution to the floor.

*"Diversey offers solutions and systems, which **help us to optimize our daily routines.**"*

## Application Control System

The patented TASKI IntelliFlow delivers the proper amount of cleaning solution and water onto the floor depending on the speed of the machine. As the operator slows down, the advanced system adjusts in real time to use less solution—decreasing water consumption by up to 50%, reducing time-consuming tank fills, and lowering costs. That means faster cleaning with consistently dry floors and sustainable value for your business.

## The IntelliFlow advantage

Without TASKI IntelliFlow, solution is delivered unevenly. As the machine slows in turns, more solution is released per square foot, causing puddles, wasted supplies and more frequent tank refills.

TASKI machines with IntelliFlow use speed-dependent application technology to always deliver a consistent amount of solution, decreasing the number of tank refills and wasted water.

**TASKI IntelliFlow reduces water consumption by up to 50%, improving efficiency and delivering environmental sustainability.**

## Superior performance all-in-one system

- Immediate drying lowers accident risk, allowing for faster, consistent dry times
- Up to 50% saving of cleaning solution versus conventional machines
- High quality and consistence of cleaning result

*“The TASKI swingo range **allows for very efficient cleaning within congested and open areas** and helps us save time compared to other machines in the market.”*

## Dilution Control System

Diversey Care's TASKI, IntelliDose system calculates and delivers the optimal amount of chemicals for any task or floor type, ensuring superior cleaning while controlling and reducing chemical consumption. The disposable pouches can be swapped effortlessly, making them easier to use and improving safety. Our unique approach maximizes effectiveness and simplifies your operation—taking your cleaning to a new level.

## Simple, safe and environmentally friendly

- Closed pouches for secure handling and no operator contact with chemicals
- No manual dosing required, removes operator guesswork – just fill tank with water and start cleaning
- Simple pouch change – acoustic warning signal indicates when pouch is empty
- Selection of different products for different tasks, meeting all requirements for various floors and application areas
- 5 times less chemicals used, resulting in less storage space and 90% packaging material reduction

**Superior chemicals and advanced technology allow machines to clean up to 45.000m<sup>2</sup> with just one pouch.**

*"The predictable chemical consumption allows us to **control costs, simplify planning and reduce chemical stocks.** In addition, TASKI IntelliDose is easy to handle while providing superior cleaning results."*

With TASKI IntelliDose and IntelliFlow, water and chemical consumption are reduced by up to 50%, delivering sustainability for the environment and your business.

Diversey has been, and always will be, a pioneer and facilitator for life. We constantly deliver revolutionary cleaning and hygiene technologies that provide total confidence to our customers across all of our global sectors.

Headquartered in Fort Mill, South Carolina, USA, Diversey employs approximately 9,000 people globally, generating net sales of approximately \$2.6 billion in 2017.
