Drain complete fresh
water tank by using
the hose

3

Cleaning with chlorine tablets

Fill fresh water tank, put
chlorine tablet in tank

4

Finishing

Empty chlorine
solution through
the hose

Best practice tips in how to use the cleaning machine most effectively

If you wish to use the machine to disinfect an entire floor please remember contact time is paramount – so indirect cleaning methods should be adopted to ensure the product gets the required contact time.

When using the machine to disinfect the floor this is also disinfecting.

MACHINE MUST BE FULLY RINSED AFTER USE WITH CHLORINE.

Make sure that the floor cleaning path is cleaned thoroughly to ensure all areas are covered. Overlap passes to avoid missing any area.
