

Divermite™

Put lower cleaning costs on the menu

Put lower cleaning costs on the menu

Divermite brings you:

- A sparkling clean kitchen
- Lowest and predictable cleaning cost
- No costly application errors
- Clean and safe working conditions

A sparkling clean kitchen

The Divermite system offers maximum economy by delivering high performance kitchen cleaning products as highly concentrated liquids.

The compact Divermite range of frequently used, high performance products ensures a sparkling clean kitchen, with food preparation and cooking areas that are fully sanitised and totally clean.

Each recyclable 1.5 litre pouch provides from 100 to 300 reusable bottles of solution.

Lowest and predictable cleaning costs

The products are dispensed into ergonomic, colour coded application bottles.

- The system combines highly concentrated product formulations with accurate dosing. The result is significantly improved cost-efficiency in all your kitchen cleaning.
- Wall mounted dispensers, with patented built in repeat delay, prevents accidental overdosing.

No costly application errors

Divermite is easy to use, helping you avoid costly application errors.

- The 1.5 litre pouch of colour coded concentrate slots into the dispenser in seconds, and is released into an easily identifiable, colour coded spray bottle at the push of a button.
- The reusable, application-specific bottles have unique key necks to ensure the right product is dispensed into the right bottle.
- There are two Divermite versions: Divermite S for dispensing into spray-bottles or into buckets with the help of a ladle, and Divermite Plus that dispenses directly into the sink via a directable spout.
- Installing Divermite is easy; no plumbing or electrical connections are needed.

Clean and safe working conditions

Divermite is quick, clean and safe to use, allowing your staff to work in a smooth running, pleasant working environment.

- Small packs are easy to handle and store, and avoid the use of untidy canisters.
- The small pouch with super concentrate can be easily compacted and folded after use, resulting in 92% less plastic waste than conventional packaging. You minimise environmental impact while maximising savings on waste disposal costs.

Product	Description
 Suma Star-Plus D1 plus	Concentrated hand dishwashing product
 Suma Multi-Conc D2 conc	Concentrated all purpose cleaner
 Suma San-Conc D4a conc	Concentrated sanitiser
 Suma Bac-Conc D10 conc	Concentrated detergent sanitiser

Features:

- 1** Closable lid
- 2** Quick pouch connection
- 3** Indicator for dosing
- 4** Push button
- 5** Bottle connector
