Chlorine Based

The following range of Chlorinated bleach products are available for use in accordance with local Healthcare and facility policies and guidelines. Refer to New Zealand Ministry of Health "General cleaning information for COVID-19". Note: Indoor and covered outdoor areas that are regularly accessed by the public must be cleaned with detergent and water at least daily to remove germs and dirt from surfaces. For indoor areas, once cleaned, surfaces can be disinfected with hypochlorite (a bleach solution) and dried with a clean cloth after the manufacturer's recommended dwell time. Alternatively, use a combined detergent and disinfectant product. Keep all cleaning and disinfectant products out of the reach of children.

Code	Product Name	Pack Size	Category	Dosage to prepare 1000ppm chlorine solution
720323	CLAX HYPO 42A1	20L	Liquid chlorine bleach	20ml/L or 1:50
