Booster - food soils for colored linen

Description

Clax 100 Color is a liquid surfactant booster based on a blend of surfactants.

Key Properties

Clax 100 Color is an effective booster based on a blend of nonionic surfactants. This product shows excellent performance on fatty/oily soil. Once removed from fabric, fat and oil are effectively dispersed by Clax 100 Color, thus preventing redeposition.

Clax 100 Color is mainly used in conjunction with alkalinity boosters and/or mainwash detergents. In combination with the latter its main function is to improve dispersion of fatty and oily soil, thus enhancing wash performance on heavily soiled goods such as cotton and polyester/cotton workwear and table linen.

The absence of optical brightener renders this product suitable for use on pastel coloured fabric. In addition Clax 100 Color can be used for special applications such as clean room processes.

Benefits

- Excellent performance on fatty and oily soil
- Good foam control properties optimal use of washer mechanical action
- Suitable for use on pastel coloured fabric

Directions for use

Use Clax 100 Color at concentrations between 1-5ml/kg dry goods (0.1-0.5%) depending on the type and degree of soiling and wash classification.

Technical data

Appearance Clear colourless liquid

pH [1% solution]: 6.0 Relative Density [20°C] 1.0

The above data is typical of normal production and should not be taken as a specification.

Safe handling

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet.

Storage information

Store in original closed containers or (where applicable) in an approved bulk tank, away from extremes of temperatures.
