

Neutra 3 in 1

63A1

Neutralizer - rust remover and anti-chlor

Description

Clax Neutra 3 in 1 is a liquid laundry sour used to neutralise remains of alkalinity and chlorine at the end of the total wash process.

It contains a unique combination of organic and inorganic acids which biodegrades easily. In contrast to most organic sour, Clax Neutra 3 in 1 has unique formulas that act effectively against iron and manganese. It has the most potent reducing agent that neutralizes chlorine.

Additionally, Clax Neutra 3 in 1 contains an ingredient to sequester traces of iron which might be present in the final rinse. The final pH in the wash should be between 6 and 6.5 to ensure that the linen is fully neutralised.

Key Properties

- Reduces the need for extra rinsing to get the pH of the fabric to the correct level. Ensures correct conditions for minimal fabric damage.
- Prevents fabric damage and yellowness due to residual chlorine.
- Eliminates chlorine odour from fabric.
- Prevents yellowing of fabric due to traces of iron in the rinse water.

Designed for

- Neutralizes excess alkalinity on wash goods.
- Neutralizes excess chlorine.
- Contains iron sequestrant.

Directions for use

Use Clax Neutra 3 in 1 at concentrations between 1-3ml/kg dry goods depending on the type and degree of soiling and wash classification. The use of this product is advised in the neutralization stage of the washing process.

Neutra 3 in 1
