

CLAX Soft Extra

5DL2

Concentrated fabric softener

Description

Clax Soft Extra is a concentrated fabric softening liquid specially formulated for use in commercial and on premise laundries. The product is suitable for application on most types of fabric and can be manually or auto-dosed.

Key properties

Clax Soft Extra is a concentrated fabric conditioner based on biodegradable cationics, quaternary ammonium salts. In the wash solution, these positively charged cationics, adsorb to the negatively charged surface of fabrics. Once adsorbed onto fabric the cationic has a lubricating effect. During the drying process, this prevents interlocking of individual fibres and build-up of static electricity (especially on synthetic fibres). In addition lubrication facilitates ironing/calendering. The product has also been formulated with perfume, which leaves a pleasant smell on fabric.

Clax Soft Extra. can be used for most types of fabrics, but is particularly effective on bulked or textured fabrics, such as towels. It also imparts a smooth, silky feel on woven or flat knitted fabric. The use of a concentrated product has relatively less impact on the environment (packaging, logistics etc.).

Benefits

- Good softening of many types of fabric (towels, sheets, wool, delicate articles etc.)
- Prevents build-up of static electricity on synthetic fabrics
- Delivers a pleasant residual smell
- Is based on biodegradable raw materials.

Directions for use

Use Clax Soft Extra at concentrations between 1-6 ml/kg dry goods depending on the wash classification. The softener should be applied in the last rinse of a washer extractor or in the last section of a continuous batch washer.

Please note that this product should not be used on: Articles made of micro polyester fibers such as clean room garments and water repellent theatre linen and microfibre cleaning cloths/wipes.

Soft Extra
