CLAX®

Suspend Extra

13A4

Xcell water conditioner

Description

Clax Suspend Extra is mainly used for heavy soil conditions in CBW where recycled water may have a higher build up of soil. Clax Suspend Extra is formulated for water conditioning in all laundries. It is effective in the sequestration of iron and water hardness (calcium and magnesium) salts.

Benefits

- Prevents fabric graying by softening water in wash solution.
- Improve soil removal on F&B linen by preventing soap scum formation
- Prevents fabric yellowing by chelating metal ions in wash solution.
- Prevent washer extractor or CBW scaling
- Prevents build-up of static electricity on synthetic fabrics

Directions for use

Use Clax Suspend Extra at concentrations between 0.5-4 ml/kg dry goods depending on the type and degree of soiling and wash classification.

Therefore, Clax Suspend Extra dosage will be decided by amount of water hardness needed to sequest from mainwash. For further details on dosages, check our standard wash process

Technical data

Appearance	Colorless to pale yellow liquid
pH value [1% solution]	10.0 - 12.0
Odor	Characteristic

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Keep only in original container. Store in a closed container away from extremes of temperatures. Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet.
