Sink San EasyPack

D4.8

Sink Sanitizer

Description

Suma Sink San EasyPack D4.8 is a specially formulated powder for disinfection of kitchenware and utensils in food preparation areas.

Key properties

Suma Sink San EasyPack D4.8 is a concentrated powder in a sachet that is very effective as a disinfectant for use on kitchenware and utensils during manual warewashing procedures. It is ideal for sanitizing dishes, pots, pans, glassware and utensils without affecting the flavor or aroma of food products. The product is a stabilized chlorine powder, easily soluble in water and very effective as a disinfectant against a wide range of micro-organisms in all water conditions. It is packed in sachets that provide users with convenience and flexibility for use.

One sachet per 38 liter water delivers 100 ppm active chlorine.
Local regulatory rules may require different levels of chlorine in solution.

Benefits

- Effective against a wide spectrum of micro-organisms, helping to improve hygiene levels
- Effective in all water conditions
- Safe for use on all kitchen surfaces
- Ideal for sanitizing dishes, pots, pans, glassware and utensils
- Slow-releasing active chlorine compound that can remain effective for up to 8 hours
- Easy, convenient to use
- Portion dose for controlled use

Instructions for use

3rd sink disinfection:

1. Scrap and rinse utensils before hand washing.
2. Wash in first sink using warm water filled with Suma Sink Det EasyPack D1.8 dishwashing detergent. Clean the utensils with brushes or scouring pads.
3. Rinse each piece in second (middle) compartment sink containing clear water.
4. In third sink, mix contents of 1 sachet in 38L of water (1sachet/38L).
5. Immerse dishes and utensils for at least two minutes in sanitizing solution.
6. Rinse dishes and utensils thoroughly with clean water and place on drain rack for air drying.
7. It is recommended to use 'Chlorine test strips' to check the level of chlorine concentration regularly. Recommend to check twice per day.
