

Deosoft Breeze

54A1

Fabric Softener – long lasting and odour-counter acting

Description

Clax® Deosoft Breeze 54A1 is a fabric softener with malodour neutralising technology specially formulated for use in commercial and on premise laundries. The product is suitable for application on most types of fabric and can be manually or auto-dosed.

Features

Clax® Deosoft Breeze 54A1 is a fabric conditioner based on biodegradable cationics and quaternary ammonium salts. In the wash solution, these positively charged cationics bond to the negatively charged surface of fabrics thus creating a lubricating effect for the fabric. During the drying process this prevents clogging and build-up of static electricity.

Clax® Deosoft Breeze 54A1 contains a modern perfume which provides extra freshness to the fabric. The product is also equipped with odour neutralization technology. This technology reacts with urine type malodours which are sometimes present on the fabric even after the washing process. It does not mask the malodour but permanently eliminates the molecules that carry the odour.

Clax® Deosoft Breeze 54A1 can be used for most types of fabrics, but is particularly effective on bulked or textured fabrics such as towels. It also imparts a smooth, silky feel on woven or flat knitted fabric.

Benefits

- Excellent softening of many types of fabric (towels, sheets, wool, delicates etc.).
- Prevent build-up of static electricity on synthetic fabric.
- Delivers a pleasant residual smell.
- Is based on biodegradable raw materials.
- Contains Odour Neutralization Technology which eliminates malodours.

Application areas

- Healthcare
- Lodging
- Government
- Commercial
- Laundry

CLAX®

Deosoft Breeze

54A1

Directions for use

Clax® Deosoft Breeze 54A1 should be added into the final rinse of the wash cycle. Avoid pouring directly onto the fabrics. Recommended dosage is 5-10ml/Kg of dry goods. Do not use fabric softener where iron content of water exceeds 0.1ppm as fabric yellowing may occur.

Please note that this product should not be used on:

- articles dried on calenders with a polyester felt
- articles made of micro polyester fibres such as cleanroom garments and water repellent theatre linen

Technical data

Appearance	Thin green liquid	Relative density (20°C)	12.7
Dilution	5-10ml/L	pH (neat)	3.2

The above data is typical of normal production and should not be taken as a specification.

Product	Pack size	SKU Code	Availability
Clax® Deosoft Breeze	20L	7522292	NZ

Safe handling and storage information

Store in original closed containers or (where applicable) in an approved bulk tank, away from extremes of temperatures. Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet.

Product compatibility

Clax® Deosoft Breeze should not be used on articles made of micro polyester fibres such as cleanroom garments and water repellent theatre linen and microfiber cleaning. This product is compatible with most Clax® fabric washing products.
