TASKI® swingo 150 E

Ultra compact upright automatic scrubber drier

Key features

- Simple and ergonomic operation
- Easy cleaning of confined areas
- Perfect cleaning results and dry floors
- Easy storage

Simple and ergonomic operation

The functional design of the TASKI swingo 150 E is similar to conventional upright-vacs; the machine requires limited training and is simple to use. The preparation time for cleaning is less than 60 seconds. With a light weight of 11.7 kg in total and only 1.3 kg handle weight with a full tank, the machine can be easily pulled in any direction.

Easy cleaning of confined areas

With the unique low height brush unit, the TASKI swingo 150 E allows quick and easy access under furniture. The machine can be used in restaurants, kitchen areas, service stations or shops, where conventional automatic scrubber driers are simply too heavy and manual cleaning methods do not deliver the required hygienic results.

Best cleaning results and immediately dry floors

High mechanical scrubbing action and a pressure ten times higher compared to manual cleaning ensure best cleaning results.

The industry-leading suction unit results in perfectly dry floors – in both directions. Cleaned areas can be used immediately, and safety is improved by reducing the risk of slip-fall accidents.

Easy storage

With very compact dimensions, the TASKI swingo 150 E is easy to store and will fit in the smallest of spaces. Comfortable handles make it easy to lift and transport up stairs.

1 x cylindrical scrubbing brush 33cm	

Description of features

Integrated tank: Both the solution and recovery tank are integrated in one unique container. The removable tank can be quickly lifted off for draining or refilling. Due to its wide opening, the tank can be easily cleaned. The tank includes a dosing aid for correct solution dosing.

Sustainable solutions: Compared to bucket cleaning, the TASKI swingo 150 E needs 50% less water and chemicals. The machine can be 100% recycled.

For professional use: The TASKI swingo 150 E is designed for reliable operation. The chassis, made of high impact ABS, is durable and strong.

Easy maintenance: The brush can be changed without tools quickly and easily to reduce downtime and service costs.
