

Twister™ Intellipad®

Twister IntelliPad is a diamond infused floor care pad for cleaning and burnishing of both coated and non-coated floors. This is a premium pad, with an outstanding sustainability profile, made of PET fibers and topped with a special diamond mixture that provides excellent cleaning results. The type of diamonds used make IntelliPad less abrasive than standard red pads and keeps the floor finish smoother for an improved appearance.

Now our new, next generation Twister IntelliPad has a higher more refining grit with performance improvement over the original IntelliPad. The longevity of the diamonds and pad integrity allow for extreme coverage from 400-600K leading to exceptional low in-use cost. It cleans and brightens Terrazo flooring without added complexity and is gentle and effective on coated and factory coated floors. The higher grit is gentler on multiple surfaces and allows for a smooth transition from one surface to another.

Key advantages

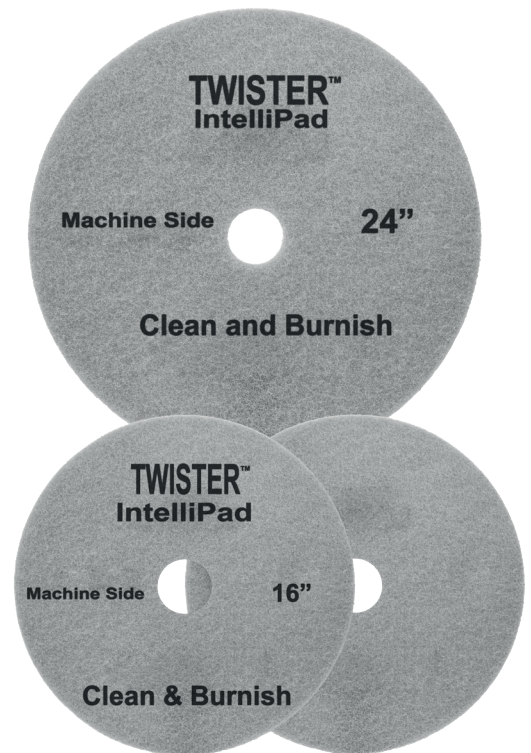

- Safely clean and transition from one floor surface to the next
- Maximizes floor cleanliness and appearance
- One pad serves for both burnishing and daily cleaning
- Superior quality and longer life (3 to 4 times longer than a conventional pad)
- Sustainable – 100% recycled material
- Fully integrated with TASKI® machines and Diversey chemicals to deliver highest cleaning efficiency available

Benefits

- Significant appearance with easy and no additional effort or complexity
- Reduction of needed burnishing
- Remarkable cleaning and brightening on terrazzo floors
- Increases metered gloss and clarity
- Improves scratch repair on all types of finish
- Enhances appearance
- Easy to use
- Simplicity

Designed for

Every customer who is searching for simplicity and efficacy in their daily cleaning and burnishing methods (Government/Education, BSC, Healthcare, Hospitality, Retail, etc..)

Twister™ Intellipad®

IntelliPad is designed to be used for:

- Daily cleaning with auto scrubber and single disc machines (150rpm to 330rpm)
- Burnishing/polishing with single disc machines (from 400rpm to 3000rpm – UHS machine)
- Suitable for resilient floor, coated or non-coated (VCT, Vinyl, LVT, Linoleum) and PU floors (layered floors)

Chemical recommendation (IntelliDose Solution):

For better cleaning efficiency, to enhance floor cleanliness, to improve waste water pick up, to sublimate floor brightness and to confer additional protection, use TASKI IntelliDose chemicals: TASKI Jontec Tensol ID (Europe) and Revive Plus SC ID (North America).

Use Directions

The pad is used with cleaning solutions to clean and buff floors.

- Place the pad under the auto scrubber/single disc machine pad holder
- Clean/polish the floor with proper equipment
- Pick up dirty cleaning solution/dust
- All pads are grey with black inscription on top to indicate proper direction of pad use

Take care of the pads

- After use, remove the pads from the pad holder
- Rinse the pads under tap water and leave to dry
